

Robotic Process Automation

“RPA makes the works automated by letting robots remember jobs”

Human can become more *creative*,
Service quality can become *better*
through a coexistence / replacing the works by robots (Digital Labor)

Reduce workload

Robots works the tasks instead of human reduces workloads and you can work on more advanced tasks by using that time.

Reduce human errors

By robotic automation, human errors will be reduced and accuracy of work will be improved.

Increase productivity

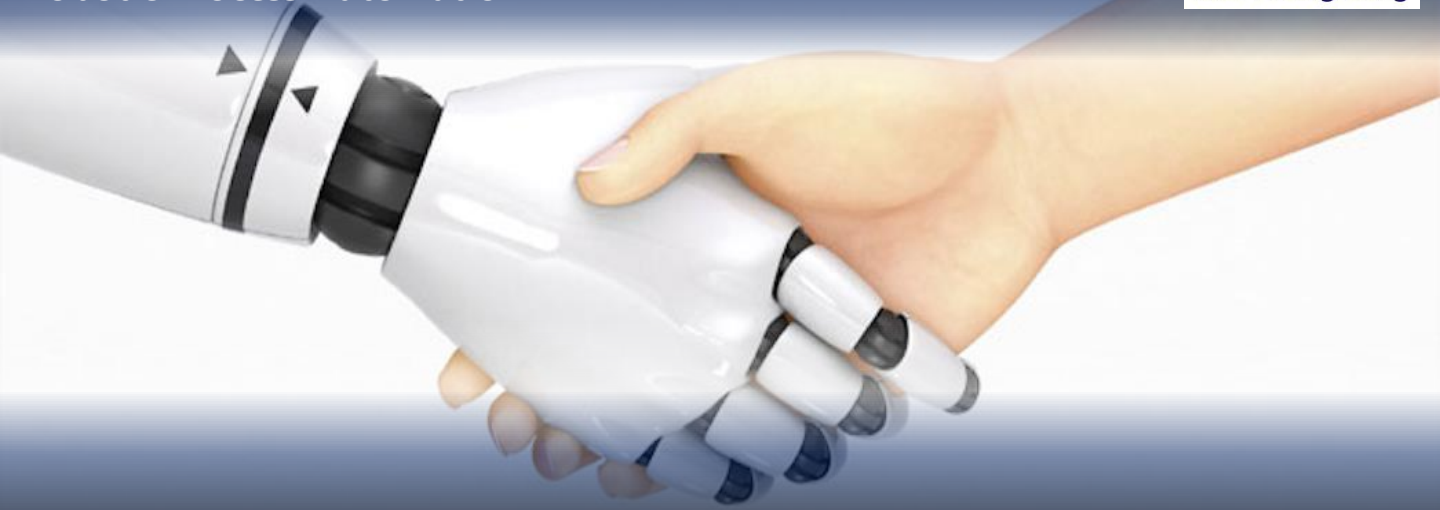

Improve productivity at hundreds of times faster than people do by working with robots.

Service quality improvement

Improve service quality by using accumulating and analyzing new data by robots work 24x7.

RPA opens the door of Forth Industrial Revolution

Robotic Process Automation

KDDI sells license of RPA and teach how to use it (charged)

Purchase/Training RPA

Must be automated smoothly

Automating works

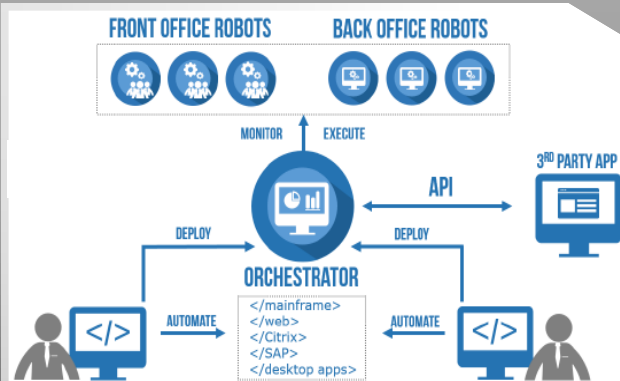

Dispatch KDDI engineers (charged)

Expanding of RPA

Support expanding on the area / branches KDDI has been succeeded by RPA (charged)

World leading company of RPA, UiPath(HQ;U.S. / N.Y.) was founded in 2005. Established a Japanese corp. in Feb. 2017 and already provided 'UiPath' to major financial institutions such as Megabanks, major manufacturing / advertising / logistics / electric power companies. KDDI HQ has already installed it. KDDI shanghai has launched to sell it alike.

1. Purchase from one robot with low price
2. Windows apps, Web apps / Citrix etc.
3. Set up by recording and flowchart
4. Carry out Robot centralized management /schedule
